Gary,
See the attached report generated by our Tow Works software for the 2014 month of December, 2015 months of January & February shifts in and shifts out. These reports do not reflect the traffic of Kirby Corp, Echo Towing, American Commercial Lines, Guidry Towing, Crosby Tugs or Boone Towing during the specified time. Average draft of the Tow Boats is 7.5 feet.

Brian,

I may have missed it, but don't remember any info on this – can you send something?

Thanks,

Gary Miller

Gary,

I will accumulate some data for you. I will try and have something back to you next week. Thanks, and good to hear from you as well!

Subject: San Jacinto River Traffic

Brian,

Good talking with you today. As I mentioned, the Army Corps of Engineers is doing a study on the San Jacinto Waste Pits, and has asked for some input on the ship traffic in the area. Whatever information you could provide would be appreciated, including average (or typical) ship speed, power, size, draft, and propeller information (diameter & whether ducted or non-ducted). Please let me know if you have any questions on this. And thanks again for your help.

Regards,

Gary Miller
